DETAILED ACTION

Allowable Subject Matter

1. Claims 1-22 are allowed.
2. The following is an examiner's statement of reasons for allowance: The prior art of record fails to teach, disclose, or suggest, either alone or in combination a motor housing having a casing, an output shaft extending from the casing, the housing defining a cavity with an open end for receiving the motor and a partially closed end opposite the open end such that the output shaft can extend from the partially closed end but the motor cannot be removed from the housing through the partially closed end, the housing having a length larger than the axial length of the casing such that the entire casing of the motor can be received within the cavity; an end cap configured to substantially close the open end of the housing and retain the motor in the housing; a first isolator member configured to be sandwiched between the casing and the end cap to substantially isolate the motor from both the housing and the end cap; and a second isolator member configured to be sandwiched between the casing and the housing to substantially isolate the motor from the housing. Therefore, the limitations contained on claims 1-22 are considered to be in condition of allowance.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. See PTO-892.
